

Greetings!

For the first time in 47 years, seven regional planetarium organizations (GLPA, GPPA, MAPS, PPA, RMPA, SEPA, and SWAP) are coming together for a U.S. national planetarium conference! The conference is being hosted by the Saint Louis Science Center and the James S. McDonnell Planetarium and is shaping up to be an exciting, not-to-miss event. Sessions will take place at the Saint Louis Science Center and the historic Renaissance St. Louis Airport Hotel, which is also the conference hotel.

We are reaching out to you, a supporter of planetariums and astronomy education, to ask that you consider supporting the Pleiades National Planetarium Conference at one of the sponsor levels listed on the following pages. There will be many opportunities for sponsors to interact with attendees, including at the Sponsor Hall, in Sponsor Showcases, and during breaks and meals. Sponsor recognition will also appear in the conference program and on signage.

Because this is the first national planetarium conference in almost 50 years, we expect a high attendance of planetarium professionals from across the United States and beyond. The schedule is already filling up with exciting presentations, workshops, and opportunities for networking, and we hope you will join us for what will be a high-energy, information-rich conference.

We appreciate all that you do to support planetariums and astronomy education throughout the year, and we thank you for considering being a sponsor for the 2017 Pleiades National Planetarium Conference. We hope to see you in Saint Louis!

Anna Green
Planetarium Manager
James S. McDonnell Planetarium

Kevin Williams, MAPS president-elect
Representing GLPA, GPPA, MAPS,
PPA, RMPA, SEPA, and SWAP
